Air Conditioners

Exclusive Micro-Channel Design

Benefits of Micro-Channel Over Traditional Copper/Aluminum Condensers-

- Uses approximately 40% less refrigerant
- Smaller size cabinet at same efficiency
- Fewer brazed connections - Less chance for leaks
- Tougher - Standing on the coil does not bend the fins

Why Micro-Channel Is More Efficient-

- Has more surface area for the air to contact - Providing better heat transfer
- Less resistance to the airflow - Allowing more air to pass through the coil
